

PDC 700

DUST CONTROL FLOOR COATING

PDC 700 Floor Coating captures over-spray, dirt and dust to the floor for cleaner work. PDC 700 has a static formula that neutralizes contaminations electrical charge and clumps dust together for easy cleanup. Dust Control should be used in the morning before the first booth cycle. For optimum results apply again at mid-day.

Can be applied over:

Spray booth floors
Shop floors
Spray booth floor mat

***NOT RECOMMENDED ON SPRAY BOOTHS WITH FULL GRATE FLOORS**

PREPARATION

Sweep/vacuum floor before each use, apply 1 uniform mist coat. Stir slightly before applying.

Spray gun setup:

Standard pump sprayer or garden sprayer

APPLICATION

Coats:

Apply 1 uniform mist coat every 12 - 24 hours to floor.
Make sure floor is dry and do not use water to rewet floor

CLEAN UP

Clean pump sprayer, receptacles, storage pots, etc., thoroughly with warm water. Follow EPA guidelines for proper storage and disposal.

ADDITIONAL NOTES

Do not let product freeze. Under ideal circumstances the product can be stored for 2 years. One application of 1 -2 quarts is effective for the standard size spray booth depending on floor conditions. Excess use can cause floor to become slippery. Do not apply excessively. PDC 700 can be removed by wetting floor with water and squeegeeing off surface. PDC 700 is environmentally friendly and non-hazardous.
